
Antony Angoco

3D Technical Specialist | QA Analyst

(720) 234-4291 | Queen Creek, AZ

Email: antonyangoco@gmail.com

Portfolio: <https://antonyangoco.com/>

SKILLS

- **BIM & 3D Visualization:** Revit (academic experience), Blender, Unreal Engine 5, UEFN, 3D modeling, spatial coordination, and scene assembly
 - **3D Content Pipeline:** Substance Painter, Substance Designer, PBR texturing, UV mapping, rigging, animation, and rendering
 - **QA & Documentation:** Test planning, test-case development, regression testing, defect tracking, technical documentation, Jira, and TestRail
 - **Programming & Web Development:** TypeScript, JavaScript, React, Go, Python, SQL, HTML, and CSS
 - **Production Tools & Platforms:** Google Sheets, Git, Windows, macOS, iOS, Android, PlayStation, Xbox, Nintendo Switch, and Meta Quest VR
-

EXPERIENCE

Freelance - Queen Creek, AZ

- Visual Designer

March 2024 - Present

- Partnered directly with business owners to translate project requirements into polished visual identities and digital deliverables.
- Managed website projects from requirements and design through development, revision, testing, and launch.
- Built responsive, custom websites tailored to each business's brand, services, customer needs, and long-term maintenance requirements.

Epic Games - Cary, NC

- QA Analyst

June 2023 - March 2024

-
- Collaborated with developers, technical artists, and QA teams to create test plans for new rigging and animation features in Unreal Engine 5.
 - Authored detailed test cases and validated complex 3D production workflows, helping teams identify defects before release.
 - Improved team workflows by designing an automated feedback process that reduced repetitive testing and reporting work.
 - Developed Python automation scripts that reduced manual testing requirements and improved repeatability.
 - Created and executed tests for animation and content-creation features in UEFN, verifying functionality across realistic production scenarios.
 - Modeled, textured, rigged, and animated representative 3D assets to test tools, reproduce issues, and validate end-to-end workflows.

- *Software Tester*

February 2022 - June 2023

- Tested and documented defects in Unreal Engine 4 and 5 animation tools, contributing to stable releases and clearer production workflows.
- Performed structured cross-platform validation across desktop, mobile, console, and VR environments.
- Executed black-box and regression testing on new animation features to identify issues before release.
- Documented reproducible defects, communicated findings to development teams, and verified fixes using Jira and TestRail.

EDUCATION

Arizona State University, Tempe, AZ

- *Bachelor of Science, Graphic Information Technology | Academic experience with Revit and 3D visualization*
